## 1 Introduction

### 1.1 About

The bibl $\LaTeX$ -socialsciencehuberlin style provides the citation and bibliography styles used at the Department of Social Science at the Humboldt-Universität zu Berlin.

This style is built upon bibl $\LaTeX$ -ext<sup>1</sup> and uses ext-authoryear for citations and for the bibliography. Several customisations have been done so far.

### 1.2 Installation

This style is available on CTAN.<sup>2</sup> The current release is also available in Mik $\TeX$  and  $\TeX$  live 2018 or newer. If at all possible you should install this style via your  $\TeX$  distribution (using Mik $\TeX$  Console<sup>3</sup> or tlmgr for  $\TeX$  live<sup>4</sup>). If you must install this package manually, get the files from CTAN and install the .bbx, .cbx files preferably to tex/latex/editiontopoi of your local or home  $\TeX$  tree, the other files (README.md, editiontopoi.tex, editiontopoi.pdf and editiontopoi-examples.bib) go to doc/latex/editiontopoi, you may have to refresh your file name database afterwards, so  $\TeX$  can find the files.

### 1.3 License

Permission is granted to copy, distribute and/or modify this software under the terms of the  $\LaTeX$  Project Public License, version 1.3c<sup>5</sup> or (at your option) any later version<sup>6</sup>. This style is maintained by Lukas C. Bossert (©2018).
