Contents

1　Introduction

1.1　About

The `biblatex-socialsciencehuberlin` style provides the citation and bibliography styles used at the Department of Social Science at the Humboldt-Universität zu Berlin.

This style is built upon `biblatex-ext`[1] and uses `ext-authoryear` for citations and for the bibliography. Several customisations have been done so far.

1.2　Installation

This style is available on CTAN.[2] The current release is also available in MikTEX and TEX live 2018 or newer. If at all possible you should install this style via your TEX distribution (using MikTEX Console[3] or `tlmgr` for TEX live[4]). If you must install this package manually, get the files from CTAN and install the `.bbx`, `.cbx` files preferably to `tex/latex/editiontopoi` of your local or home TEX tree, the other files (`README.md`, `editiontopoi.tex`, `editiontopoi.pdf` and `editiontopoi-examples.bib`) go to `doc/latex/editiontopoi`, you may have to refresh your file name database afterwards, so TEX can find the files.

1.3　License

Permission is granted to copy, distribute and/or modify this software under the terms of the LATEX Project Public License, version 1.3c[5] or (at your option) any later version[6]. This style is maintained by Lukas C. Bossert (©2018).

2 How to use it

For a general introduction to `biblatex` see its documentation available on CTAN[7], or have a look at the short `biblatex`-tutorial by Paul Stanley[8].
